Why study history?

SKILLS: History teaches us to ask two very important questions: why and how. This is key to sharpening your critical thinking abilities, which combine the following skills:

- Analysis
- Research
- Essay writing
- Communication
- Problem solving
- Argumentation

Historians look at all the available evidence and come to conclusions, a lot like a good detective, which helps them learn to be organised and manage information.

CAREERS: With your analytical, writing, debate and detective skills, you'll be primed for a huge range of careers in history and beyond. Areas you could go into include:

- Law
- Politics
- Public sector
- Business
- Marketing
- Journalism
- Economics
- Teaching
- Academia
- Insurance
- Social research
- Archaeology and curation (museums, galleries, archives and libraries)

Future pathways with history:

- Universities and employers have a high regard for history.
- History teaches you valuable critical thinking skills, analysis, research, writing and communication skills to help you to solve problems and form arguments for debate.
- Students who study history are well prepared for both study at a higher level (college and university) and for employment in a wide variety of industries.
